BRIGHT LEARN MOTORS

CARSALES ANALYTICS

Prepared by: Jennifer Visser

Junior Data Analytics

30 April 2026

BUSINESS OBJECTIVE

- Increase dealership profitability
- Identify high-performing car makes and models
- Understand customer management
- Support future sales and marketing strategies

Project Architecture

- Data Source → ETL Pipeline → SQL Database → Data Analysis → Dashboard → Presentation

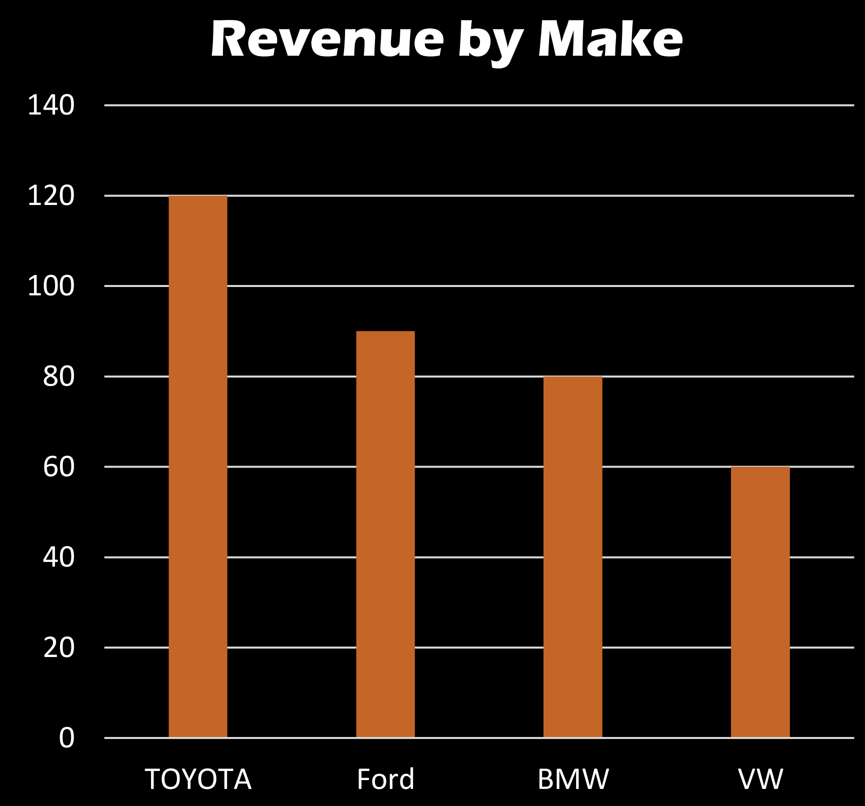
- ETP Steps
  - Remove duplicates
  - Handle missing values
  - Convert prices to numeric
  - Create calculated fields

Data Cleaning & Transformation

- Converted text-based prices into numeric format
- Created Total Revenue column
- Calculated Profit Margin
- Categorized vehicles into performance tiers
- Grouped sales by month, quarter and year

Revenue Insights

- Top-performing car makes generated the majority of total revenue
- A small number of models dominate unit sales
- High-margin vehicles contribute significantly to profitability



Regional Performance

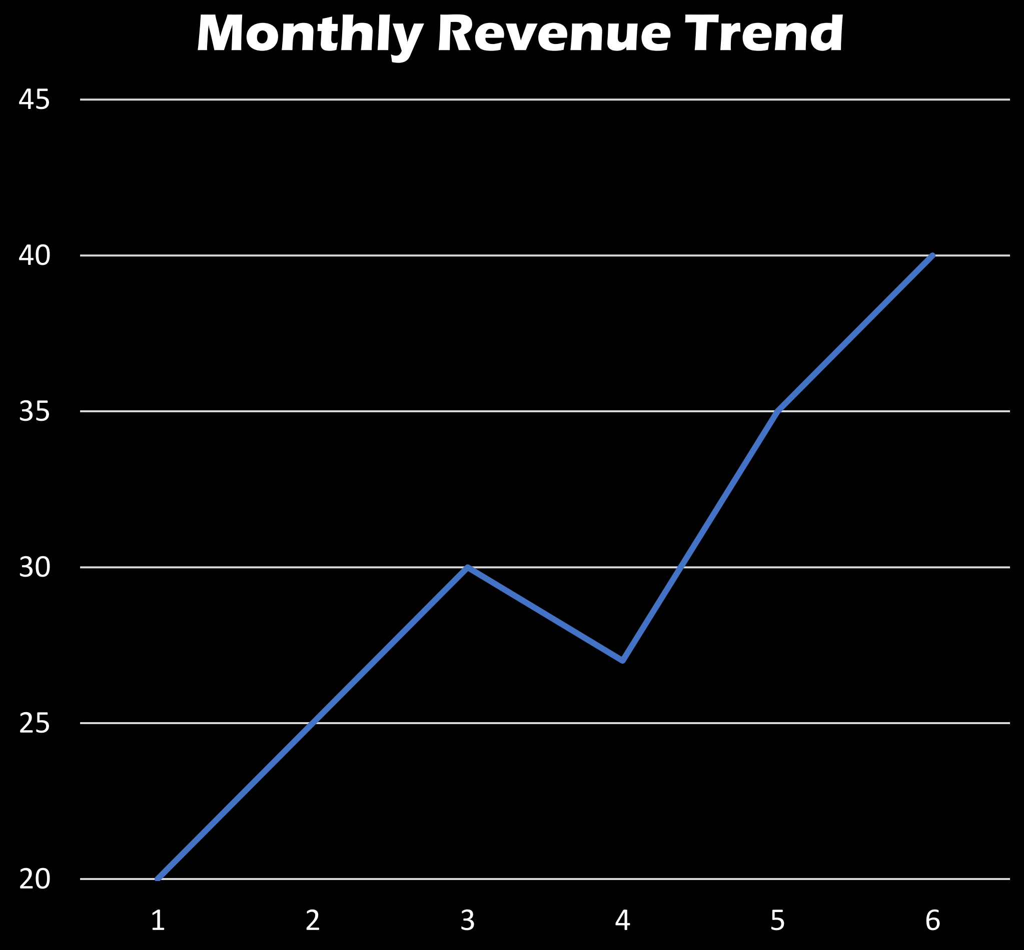
- Sales are concentrated in high-performing regions
- Certain regions outperform others in both revenue and units sold
- Regional marketing strategies can improve sales growth

Customer Purchasing Trends

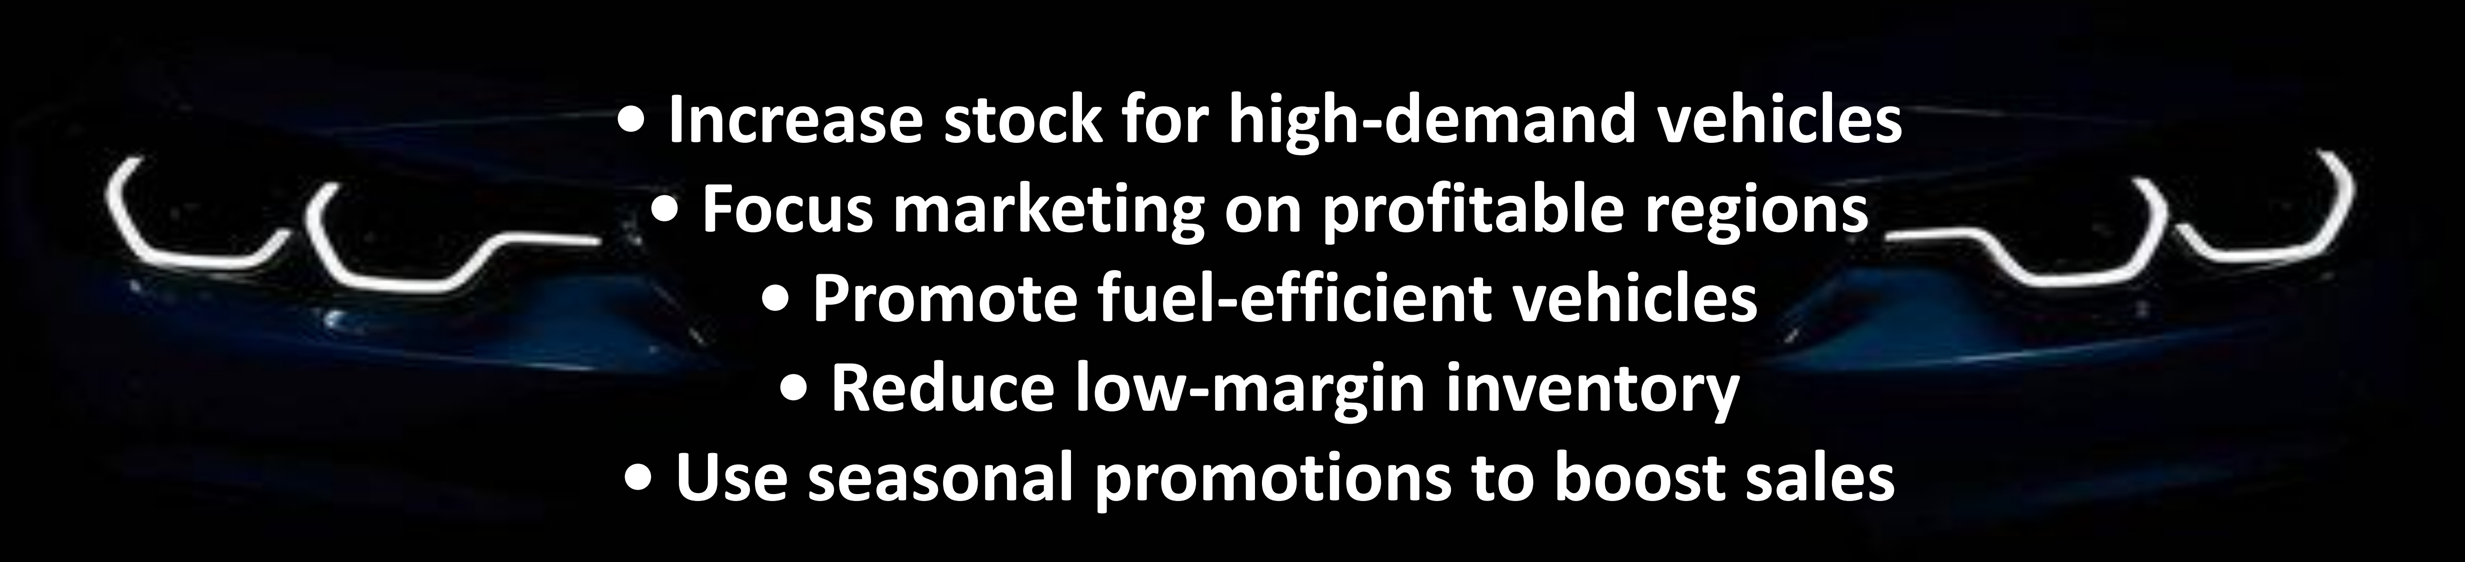
- Customersprefer newer vehicles
- Fuel-efficient vehicles are increasingly popular
- Lower mileage vehicles achieve higher selling prices

Dashboard Overview

- Dashboard includes:
  - Revenue by Car Make
  - Sales by Region
  - Fuel Type Distribution
  - Monthly Sales Trends
  - Mileage vs Selling Price Analysis
  - Profit Margin Analysis



Recommendations



- Increase stock for high-demand vehicles
- Focus marketing on profitable regions
- Promote fuel-efficient vehicles
- Reduce low-margin inventory
- Use seasonal promotions to boost sales

Conclusion

- The analysis identified key revenue drivers, regional opportunities, and customer trends that can help Bright Motors improve profitability, optimize inventory, and support data-driven decision-making.
